

As Your Work on Thumbnails Ask Yourself...

- Could I make the focal point clearer?
- Did I include Big Medium and small elements throughout the composition?
- Are there any subjects that are too much the same size? Could I use overlapping or clumping to make for more interest?
- Do I have a clear foreground, mid-ground, and background?
- Does the picture feel balanced?
- What is the emotion I want people to feel when they see the picture? How can I communicate that emotion better?
- Can I make the story clearer?
- Are there any places in the composition where tangents could be a problem?
